1.Healthify System Tests

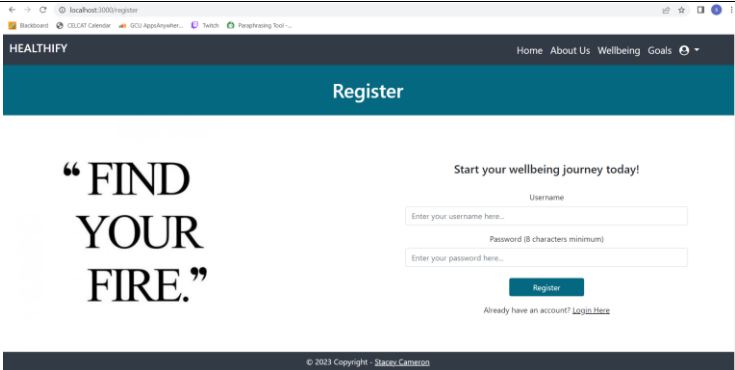

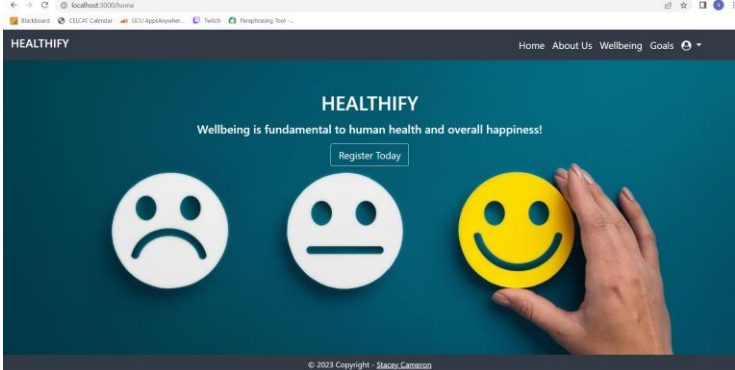

1.1 Test Scope

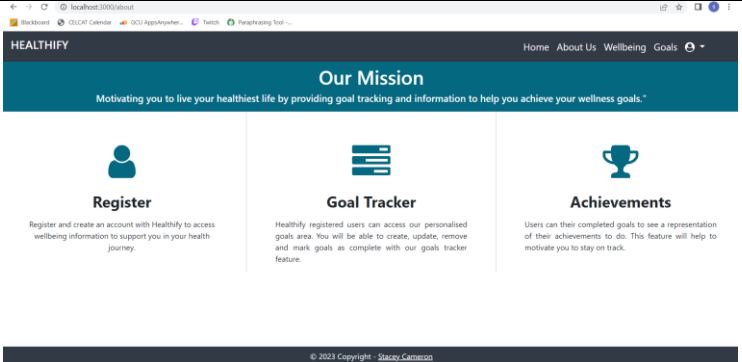

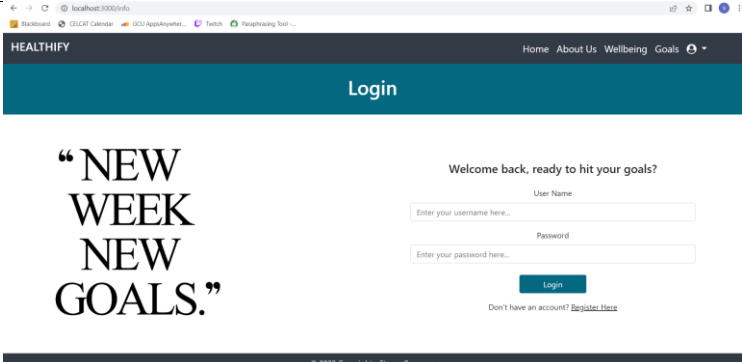

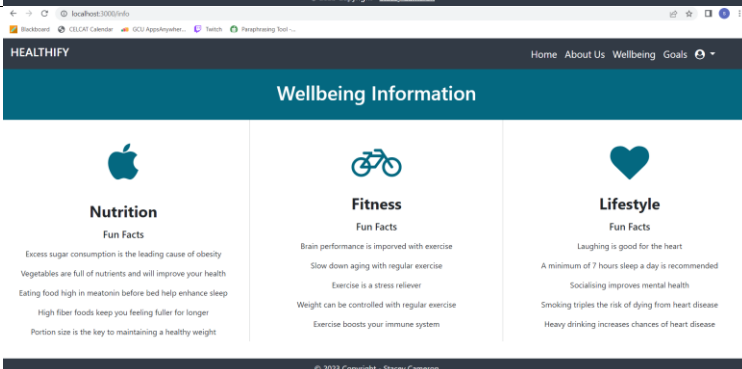

Functional testing will be the main testing method used to evaluate Healthify against the specified requirements. Testing was carried out on the following modules:

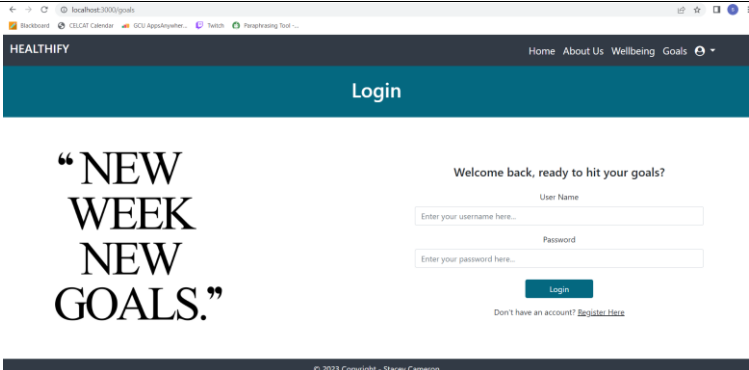

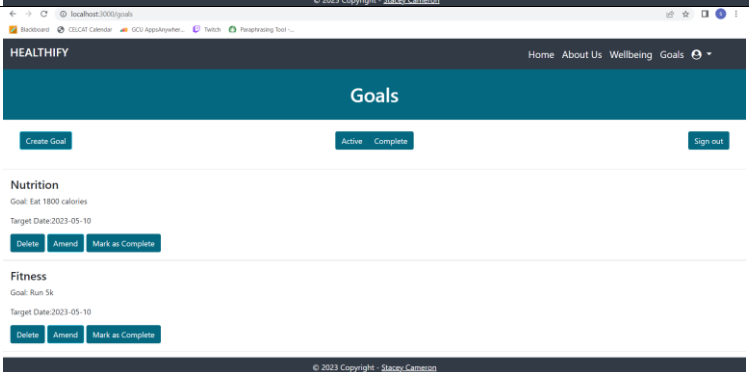

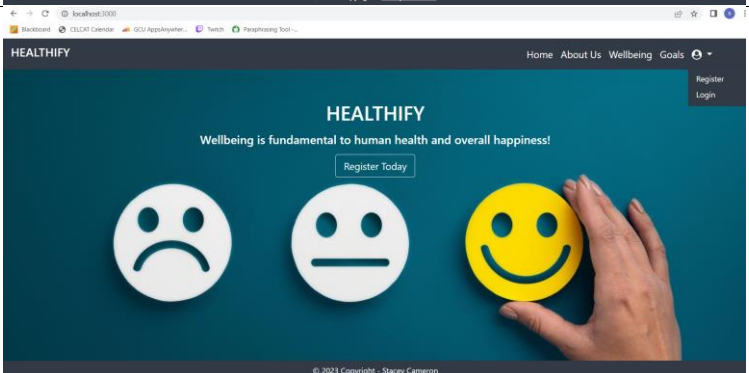

1. Landing Page (landing.mustache)
2. Navbar (navbar.mustache)
3. About Us Page (about.mustache)
4. Wellbeing Information Page (info.mustache)
5. Register Page (register.mustache)
6. Login Page (login.mustache)
7. Goals Page (goals.mustache)
8. Active Goals
9. Completed Goals
10. Create Goal
11. Amend Goal
12. Delete Goal
13. Mark Goal as Complete
14. Error Page (404)

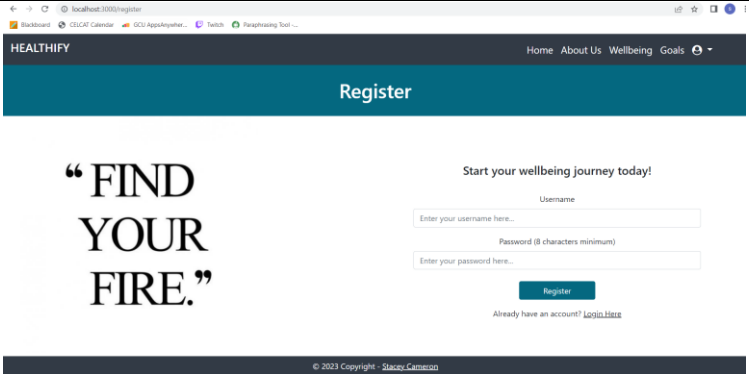

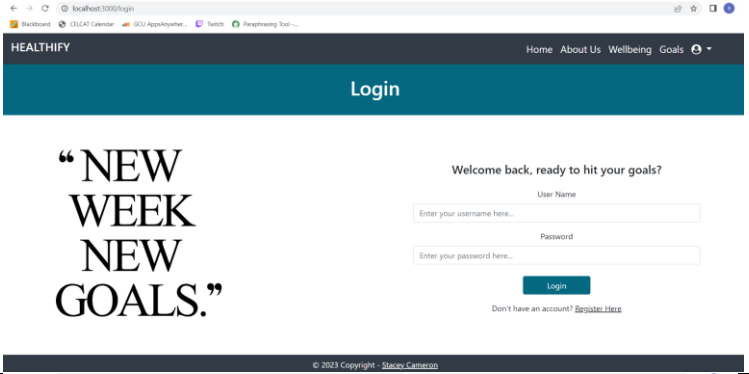

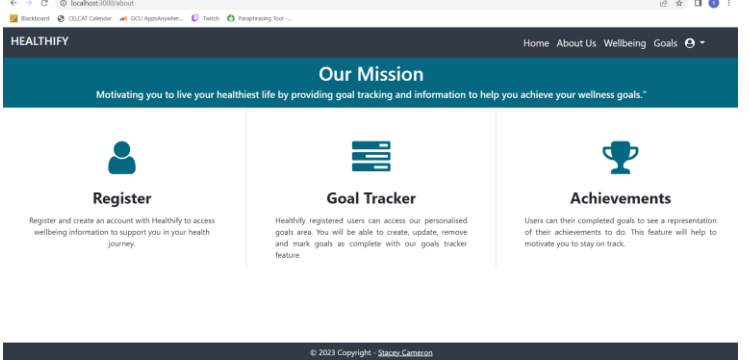

1.2 Test Cases

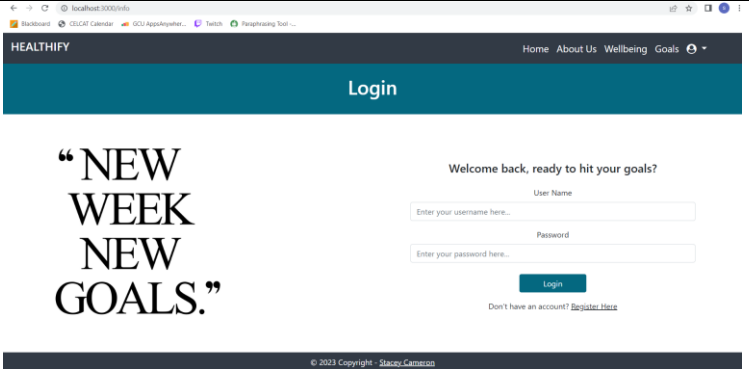

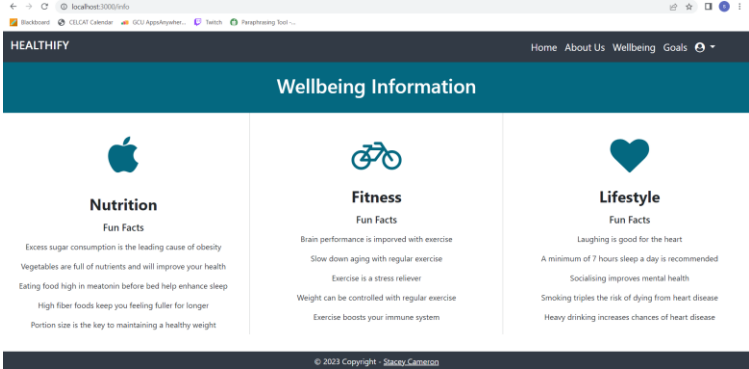

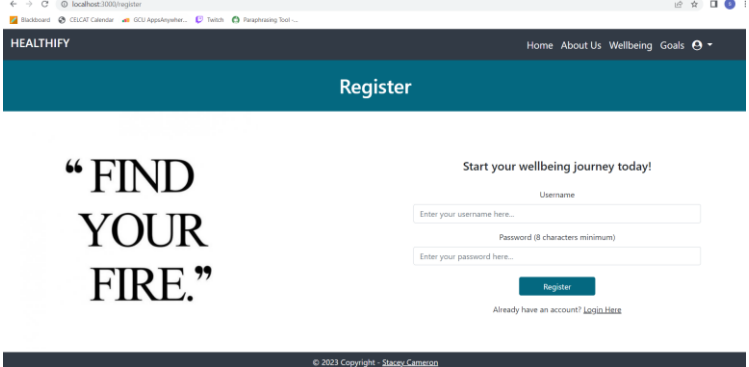

Test ID	Action	Expected Outcome	Status PASS/FAIL	Evidence
1.1	localhost:3000	Home page loads with footer and navbar	PASS	
1.2	localhost:3000/home	Home page loads with footer and navbar	PASS	

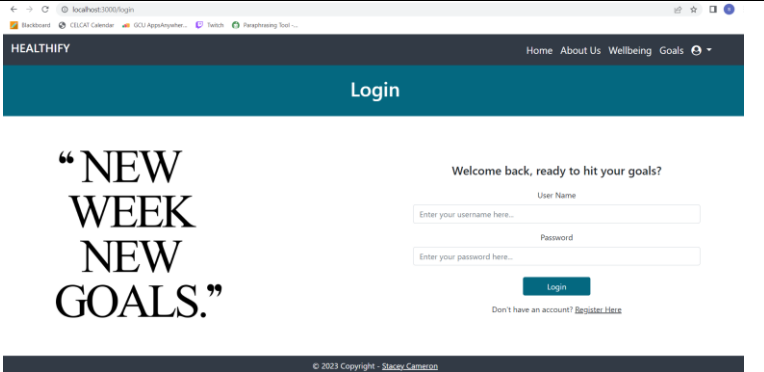

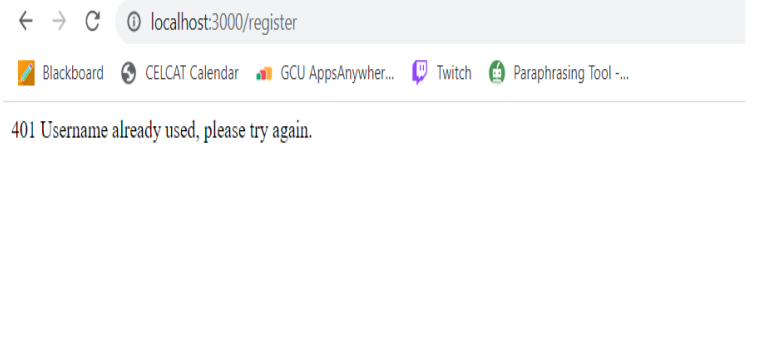

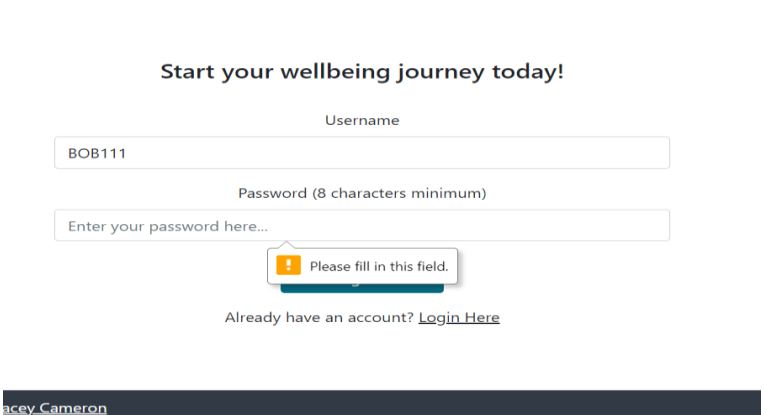

1.3	Click “Register Today”	Register page loads	PASS

1.3 Test Summary

The functionality of all pages with the exception of the goals page work as expected. The goals page currently display users active goals and completed goals, as well as allowing the user to create a new goal. Unfortunately, due to time constraints and experience I was unable to achieve a functioning amend, delete and mark as complete feature.

1.4 Changes Justification

During development several changes were made to the original development plans. The main changes being the removal of an achievements page and the layout of the goals page. Small changes were also made to the colour scheme and home page design.

- The achievements page was not a mandatory requirements and was removed due to time constraints.
- The goals page layout was amended after lecture feedback.
- The colour scheme was updated for user experience.
- The homepage now includes a full background hero image in place of the original banner hero image.
